TOWN OF RAB

**Group and Family
DISCOUNT** In price included:
Kayak, paddle, life jacket/PFD, dry bag,
certified guide, paddling instructions.

Instead of thinking, choose to clear your mind and experience your holidays in a different way. Let us give you a brand new perspective of the natural beauties that the island of Rab has to offer. We will paddle through crystal clear sea and its amazing turquoise shades of blue and green, explore hidden beaches and caves, while passing under high cliffs. The highlight of the tour is jumping into Medova Buža cave from its 4 meters high ceiling hole and then dive out, through a colorful opening, out to the sea.

We will have a swim and a lunch stop in a cave that treasures a large pebble beach within, and provides us shelter from high sun. There is also another cave nearby where we will dive in and enjoy the Adriatic colors. A longer rest for swim and sunbathing will be on the most beautiful beach that the east side of the island has to offer. The bay and beach of Ilo get their name because of the clay, mud and gravel that are making this pebble beach picturesquely colorful. All of these natural beauties mentioned above make this place a unique Geological Park.

Tour is suitable for all ages and all fitness levels.
Experienced paddlers are welcomed as well.
